## GARRY SAD TIDINGS TO ICE FETTERED WHALERS

Chief Factor of H. B. Co. Leaves  
on Long Trip to Herschell  
Island.

Icebound in that portion of the Arctic Ocean known as Mackenzie Bay are six whaling ships which are manned by crews whose homes are in San Francisco. They went into the bay last summer and wintered there.

During the intervening months they have heard no news from the outside and are today in blissful ignorance of the awful calamity that has overtaken their home city. The first intimation of the catastrophe they will receive will be through the medium of the Winnipeg Free Press, several files of which have been forwarded to them. These files contain full accounts of the disaster, and the reader can imagine the eagerness and anxiety with which the sturdy sailors will peruse the papers, which may convey to them news of the destruction of their homes or perhaps the death of loved ones.

Arrive in August  
The news will not reach them until next August, when they will be preparing to weigh anchor for home. The papers are being taken north by Mr. Thomas Anderson, chief factor of the Hudson's Bay Company in charge of the Mackenzie River district, who kindly consented to carry them on his annual trip to Fort Macpherson on the Peel River, near the mouth of the Mackenzie, where he will be met by Eskimo messengers from the whalers and the missionaries at Herschell Island. To these messengers the papers and other mail will be delivered, and they will take them to Herschell Island. These messengers, who come every year to Peel to meet the Hudson's Bay Company's packet, never before took back with them to the whalers and missionaries on lonely Herschell Island, which is 250 miles north of the Arctic circle, any information that created such a commotion

or which will be discussed with such deep personal interest and heartburnings as will the story.

Contained in the Papers of the destruction of beautiful San Francisco. The Free Press is read in every trading post and mission house in the Mackenzie River district, but this delivery of the paper to a point 250 miles within the Arctic circle is a new and novel event in the history of journalism on this continent.

Chief Factor Anderson begins his long journey to the north this month, starting from Edmonton. He takes with him goods for the various posts of the company in the district under his jurisdiction and will oversee their distribution and inspect the posts at the same time, returning to his headquarters at Fort Simpson in the early fall. From Edmonton to Peel River the distance is 2180 miles, and with the exception of the first 90 miles the trip will be made by water, the company having steamboats on the Athabasca and Mackenzie rivers.

A party of mounted police are going in with Mr. Anderson to reinforce the post now stationed at Peel and Herschell for the purpose of maintaining law and order and collecting duty on goods imported for trade with the Eskimos by the United States whalers. Three American tourists and Mr. Stefansson of Cambridge, Mass., who is going north to make scientific explorations, will also be of the party bound for the Land of the Midnight Sun.

### BE PREPARED FOR IT.

Comes without warning, strikes quick as lightning—that's lightning; but Nervine quiets the pain instantly. W. H. Powles, of Powles Corners, Ont., writes: "When applied for lumbago or neuralgia Nervine is quick as lightning. I was subject to attacks and although I used most everything, nothing relieved quickly till I discovered Nervine. Have used it also for pleurisy and sore chest and found it was just the proper thing." You won't regret trying Polson's Nervine—25c for a large bottle at your drug store.

Paper On Tennyson.—At the meeting of the Baptist church Young People's union last night a very interesting and instructive paper was read on "The Poetry of Alfred Tennyson," by Aaron Perry, B.A. Recitations from the late laureate's work and musical settings of some of his poems were given in illustration.

## COMMENCE GRAND TRUNK PACIFIC CONSTRUCTION

J. D. McArthur Starts Work on  
Grading East of City of  
Winnipeg.

The building of the Grand Trunk Pacific railway eastward has begun says the Winnipeg Free Press of May 17th. Mr. J. D. McArthur arrived in Winnipeg by the Canadian Pacific train, the Imperial Limited, at 10:30 last night and early this morning, in his office at the corner of Princess and Fonseca streets, he was receiving possible sub-contractors, consulting with his engineers, scrutinizing plans, making arrangements for supplies and men and laying out the details of his plans for carrying out the greatest contract for railway construction ever entered into in the Dominion of Canada by any individual.

There was a steady stream of callers all evidently on business intent, from keen-faced engineers and well-groomed prosperous looking wholesale merchants to the men with the rough garb, weather-beaten and sinewy hands of the western railroad builder.

There was a restrained forcefulness in Mr. McArthur's manner as if he realized the immensity of the task he was entering upon in his brief answers, his quiet reference of individuals to one or other of his staff or the quiet, contained manner in which he touched upon each question or individual that succeeded each other in the multitude of preliminary to starting the great national railway.

The Beginning  
"The Kitchen of railroad builders," said a civil engineer, who had worked at his profession in the four corners of the world and knew whereof he spoke, as Mr. McArthur within the space of two minutes had explained a detail of a plan to one of his clerks and had given explicit instructions to an employment agent.

"Work will be started at once," said Mr. McArthur to the Free Press reporter, who was dove-tailed in between a surveyor of supplies and an aspirant for a sub-contract. "The cutting of the right-of-way is to be begun at Rennie, about twenty-five miles from Kenora, immediately at the crossing of the Canadian Pacific railway. We are engaging all the men we can at once and the cutting of the right-of-way will be proceeded with as soon as they can be got on the grounds.

Plenty of Men Available  
"Do you anticipate any difficulty in getting men enough for your work on such a great piece of work?"

"None whatever," was the decisive answer. "We shall get all the men we can right here in Winnipeg and Mr. Alex. Calder will make arrangements for us through the immigration department of the Dominion government to procure what men are necessary from the old country."

"It may be said, then," was asked, "that with the cutting of the right-of-way beginning at Rennie the work upon your contract from Lake Superior to Winnipeg will be proceeded with at once vigorously and extensively."

"The completion of the work, the contract for which I signed before I left Ottawa, calls for it, you see," said

Mr. McArthur quietly as he paused to listen for a moment to a statement of a prospective sub-contractor and then moved to his desk where one of his engineers had unfolded a vari-colored plan.

## NEW EPOCH IN CANADIAN TRADE

(Continued from Page One.)

and, he asked, if these restrictions were thought proper and best, surely no company seeking charter privileges in the interests of a foreign corporation can object if the legislation is surrounded by similar safeguards.

Upbuilding of Canada  
The Canadian Pacific's policy has always been to work for the upbuilding of Canada, and it is following it out. They had at times declined alliances which entailed financial sacrifice on their part because such alliances would have interfered with what they considered their duty to the country.

He thought that that policy had been an important factor in the present prosperity of Canada, and in making the company a recognized leader in the world's commerce.

Sir Thomas's remarks were most enthusiastically received. Among the speakers, Mr. Fitzpatrick aroused the greatest enthusiasm when he seconded the remarks of Sir Thomas concerning the development of Canada's own transportation facilities. Between east and western Canada there lay an unsettled strip, and one that he did not think would ever be settled up. That strip must be the bond between eastern and western Canada, crossed by arteries of trade, which would bind the two sections of the country indissolubly together. The statement that trade followed the flag was one of the greatest fallacies of political economy. The flag followed trade, and it was for them to see that trade was developed.

The other speakers included Mr. Borden and the members of the cabinet present.

## Weak and Sickly Babies are Made Well and Strong by Lactated Food

After many years of trial in the homes of Canada and in hospitals and institutions for the young, mothers, nurses and physicians declare that Lactated Food is the best nourishment for weak and sickly babies. Lactated Food is the most easily digested of all prepared foods; it is a corrective of colic and flatulency, a preventive of dysentery and other complaints that cut down so many little ones. From every section of the Dominion letters come from mothers testifying to the life-giving virtues of Lactated Food.

Babies regularly fed on Lactated Food become happy, bright, vigorous and strong; peevishness and fretfulness are banished, and the home is made happy with the babies. Try Lactated Food, dear mother, for your little one without delay if it is not thriving. It will work wonders for your babe. Your druggist sells it and will heartily recommend it.

### LECTURER COMING.

Mme. May E. Stevenson, the great lecturer and hindoo initiate will arrive in this city this week to give a course of lectures.

This lady is not unknown in this city as she was here last year and her lectures created great interest among the people, her great power of logic and argument is well known and she should have large audiences this time. The first lectures will take place at K. of P. hall 3-8 p. m. Sunday the 27th inst. Subject, "The Elements in their confusion and the effects upon mankind." Lectures free.

Just Over.—A carload of the celebrated McLaughlin buggies and carriages in the most modern styles, and especially designed for this market, have just arrived in the city and are to be seen at Mr. Wm. Mable's show-rooms, Johnson street. Those who anticipate taking part in the grand parade during Victoria week, would certainly do well to call at Mable's show-rooms and inspect these very handsome vehicles before making up their minds as to which particular event they would like to shine in, and which rig would show their quadruped off to best advantage.

A COSTLY ARCTIC EXPEDITION.

Captain Bernier, it is said, will never find the north pole, but he has the distinction of having commanded the biggest nautical drunk ever paid for by the people of Canada. It is no reflection upon the captain, who is a brave and capable mariner, and would find the north pole if he could and were afforded the facilities which he required. It will be remembered that Captain Bernier wanted to start an expedition from Victoria, believing that this was the point most favorable to success. He could not raise the funds, although Sir Wilfrid Laurier and other eastern politicians took considerable interest in the proposal. He was able, however, to sail away into the Hudson Bay at the public expense to the tune of \$220,000 in the Arctic. The only thing he discovered of any value was the impracticability of trying to accomplish results with a crew of politicians on board. The Arctic was purchased to patrol Hudson Bay and its approaches, but the politicians of Quebec and Montreal really intended that she should be used for the purposes of having a real good outing on an expensive scale—that is, so far as they personally were concerned. It is not on record that they added anything to scientific knowledge regarding the northern seas, or did any effective patrolling, but if we may judge from the bill of supplies, they must have had a jolly good time. There were just thirty-two persons aboard, of whom eight were sailors. In what capacity the gentleman contingent went we are not informed; probably some of them were astronomers. At least they are reported to have seen stars on more than one occasion, and to have submitted an exhaustive report to the government on the nature of the "ore-eyed bore-alls," a rare phenomenon in northern waters. Some were no doubt zoologists, who studied the habits of the other animals on the voyage. Others were ethnologists to decide upon the races—on deck. There were also probably one or two prehistorians to study the bumps on the icebergs, and, of course, one or more physicians, whose services the "following day" were much in requisition. Altogether the detailed report of the expedition will be interesting and instructive to the taxpayers of Canada. Personally, the captain was very much disgusted with the results of the trip and vowed he would never undertake such an experience again in such circumstances. There were times when even the crew was disabled and he had to handle the vessel alone. The taking of observations was so laborious that it was necessary frequently to work overtime, causing nervous prostration, to which highly sensitive persons are peculiarly susceptible in high latitudes. The arduous nature of the work performed can be best judged by the amount and price of stimulants that it was found necessary to consume. They included:

10 cases of champagne at \$32.  
5 cases of brandy at \$12.  
5 gallons of Jamaica rum at \$5.50.  
15 gallons of sherry at \$4.  
100 gallons of old Jamaica rum at \$4.  
110 gallons of alcohol at \$4.50.  
5 cases of Cognac at \$12.  
5 cases of fine old crusted port at \$12.  
The liquors cost \$1,514. The supplies in the tobacco line were miscellaneous and to everybody's taste, as follows:  
500 Havana cigars at 10 cents.  
4000 Laurier cigars at \$65.

4000 D. C. C. at \$35.  
5000 cigarettes, \$50.  
200 lbs. chewing tobacco at 78 cents.  
805 lbs. at 95 cents, 528 lbs. at 53 cents, 272 lbs. at 60 cents, 1005 lbs. at 39 cents, 600 lbs. at 76 cents, 144 lbs. at 69 cents, 342 lbs. at 80 cents, 192 lbs. at 75 cents, 70 lbs. at \$1, 50 lbs. at \$1.  
5 1/2 dozen pipes at \$1, 6 dozen pipes at \$3.40, 9 dozen pipes at \$3.20, 5 dozen pipes at \$4.75, 4 1-3 dozen pipes at \$3.75.  
With 8500 cigars, over two tons of tobacco and all the liquids enumerated on board, the excursionists did well. But the other supplies were as generous and as costly as they could possibly be. The jellies and the marmalade, the walnuts and the almonds cost us over \$12,000; while the Bovril and the pemmican, which was put up in cans, called for \$19,000. There was clothing for everybody, including seven dozen silk handkerchiefs at \$13.50 per dozen, and 87 dozen shirts—1,044 in all—for the 32 men. Apparently the tourists were several sets of clothing simultaneously.

A FOSTERIAN PHILIPPIC.

Hon. George Foster is not loved by the Liberal side of the House of Commons. He has a tongue that runs fire, as well as one burning with eloquence, and some of his speeches are masterpieces in their way, having just sufficient literary flavor to lift them out of the ordinary and make them exceedingly interesting reading in themselves, apart from the topic discussed. The following is a characteristic extract from his speech on the North Atlantic Trading Company contract, which is one of the most scathing things in the Hansard of the Canadian parliament, and there is little wonder that he has been cursed so liberally in the government press:

"They go in at their worst and they come out at their best. Or, it is a kind of modern Pilgrim's Progress—not to a spiritual but to a material paradise. Your novice enters it a pauper—he comes out a millionaire. He goes in a poor pilgrim, leaning on his staff and with modest garments he comes out a pampered prince, clad in due raiment, riding in liveried chariots. Whiskey permits, Treadgold concessions, claim lifting in the north; land looting, timber, coal scrip, wire fence graft in the middle areas, Immigration frauds everywhere—crowned by a million dollar contract with a headless, homeless, homeless monstrosity, a sort of fugitive maw into which the St. Lawrence pour Canada's hard earned taxes. And who takes them out? An interrogation point may well be put after that query. All this seems to happen through the wonderful working, changing power in that temple of the interior. And after the high priests and the secondary priests have had their transformations, the acolytes spread over a wide range of country with patrimony and franchises and benedictions scattered to them with a liberal hand, applaud the progress of the chief, and now mourn his departure. But we have no sympathy with the right hon. gentleman who leads the government. Your sins are now coming home to you with just retribution; the chickens that you hatched out of these eggs are coming home to roost, as cures; you brought this gentleman from the West here; you upheld his hands, you made him powerful, you fed him, you established his cult, you put his acolytes around him, you declared that every tree he planted bore golden fruit. If tonight, these apples of Hesperides in your mouth become ashes—and bitter ashes—we deplore it, but we do not sympathize with you; not one little bit.

We trust that a kind Providence will not throw cold water on the efforts to make the 24th of May celebration a success.

BRITISH COLUMBIA SUNDAY NEWSPAPERS.

As we had anticipated, the eastern fanatic on the question of Sunday newspapers is to have his way. The Monday paper is to be permitted to be published by the employees going to work on Sunday evening at 8 o'clock. That is, of course, ridiculous to those familiar with the technical requirements of a newspaper office. In order to start the mechanical staff at work at 8 o'clock, the editorial and reportorial staffs must have a large amount of material ready. That necessitates working for some hours previous and practically all day. Is there any law effective enough to prevent an editor from placing his views on paper at any hour of Sunday, or would a serious attempt be made to arrest a reporter in writing down an account of the ordinary happenings of the day? A man would be worse than a slave who would submit to it. As for Sunday newspapers in British Columbia, we have already expressed our views on the subject. The proposed law, if it should go into effect, is unworthy of a free country and will do more to react against the attempted tyranny of clericalism than anything else we could imagine. The people of this country are prepared to comply with a reasonable and sane observance of Sunday as Sabbath, but they are not to be whipped into a slavish obedience to the dictates of any class or sect of the community. Wise men will let well enough alone, and in interfering with established institutions which work no wrong to the public to satisfy a religious fad, they are creating trouble for themselves in the future.

Among the passengers who arrived on the C. P. R. steamship Empress of Britain on her maiden trip was George Ham, who has, or had, charge of the publicity department of the great transcontinental line. We can now readily understand how the Empress got so much and such varied free advertising. Waiting to meet him as he stepped off the ship was a delega-

tion of his press friends, upon whom he smiled and cracked a joke. There is magic as well as infection in that smile, and it spread clear across three continents. Unnecessary to say, it is a very broad smile, but there is nothing like it.

Hon. Mr. Templeman, minister of inland revenue, has accepted the suggestion of Dr. Stockton, of St. John, for the appointment of a special committee to enquire into the sale of fraudulent or deleterious medicines in Canada. That is a wise move. After the doctors and the patent medicine men have been heard and other evidence taken, parliament will be in a position to judge of the merits of the proposed legislation against patent medicines. The sale of proprietary stimulants, should probably be subject to regulation, but, like the latter commodity, if people want to buy and use them, it is very difficult to prevent them. But if we are going to have sumptuary laws, let us understand something about the subject to be legislated upon.

Even Mr. Ralph Smith has waked up to the iniquities of the North Atlantic Trading Company and is endeavoring to square himself with his constituents for swallowing a government responsible for such transactions as have been exposed. The other day he moved a resolution to the effect that the Canadian parliament believes it is in the interests of British subjects that the Imperial parliament should pass legislation to prevent immigrants being brought to Canada under false representations. He cited the operations of the Canadian labor bureau in London, which was under the charge of one Leopold, and located itself alongside the Canadian immigration office, as a good reason for such legislation. Britain should pass legislation similar to what Canada had done. Men ought not to be brought to Canada under false pretences. He had reason to believe that the British government would pass the needed legislation.

An old lady living in Unlontown, Pa., lived to be 108 years old, and then concluded that she was a burden to her family and committed suicide by cutting her throat. She is probably the oldest suicide on record. Old people usually cling to life. Having experienced all the ills and hardships of existence commonly in store for humanity, they are not so easily cast down as the younger person who may become sadly depressed and in an effort of imagination see naught but an abyss of gloom before him. Mrs. McKittrick, the deceased in question, had lived during the term of all the presidents, except Washington; her mother lived to the age of 100 and her grandmother to the age of 106. Milk, butter and potatoes were her principal diet. She never tasted coffee and did not eat "cakes and pie." She was strong and mentally vigorous to the last.

LETTERS TO THE EDITOR.  
[The Editor does not hold himself responsible for views expressed by correspondents.]

A QUEER NATURAL FREAK.

Sir—Referring to a paragraph in your issue of yesterday, headed "A Queer Natural Freak," I have known a similar case. On the lawn of the rectory at Quatford, near Aylesbury, a large laburnum tree forked at eight feet from the ground, one half bore yellow, the other pink flowers; while from the fork came a bunch of cistitis bearing purple flowers. The late Professor Lindley, then editor of the Gardeners' Chronicle, expressed his opinion that the original tree was produced by crossing the yellow laburnum with the purple cistitis, and that the tree had combined the peculiarities of both parents and offspring.

Duncan, May 19, 1906. C. N. YOUNG.

THE COMMITTEE BARGE.

Sir—In answer to the question asked me, why I did not contribute to 24th of May celebration, as I have done for the past fifteen years, I beg to state that I came to the conclusion that too much of the money contributed would be given to those who were invited to partake of the bounteous contributions of others, who gave nothing themselves, and even identified on the reception barge and there treated royally by the committee. For my part, I would much rather see the policemen, who are expected to do double duty during the three days' celebration, be compensated for the extra work performed by them, the same as workmen in other trades and callings of life are paid.

H. STADTHAGEN.

VANDALISM.

Sir—The following fact should justify the request that its publication be willingly permitted in your journal as a warning to similar offending:

On Friday evening (5 p. m.) a feminine visitor to the tramway company's park at the Gorge emerged with an armful of freshly plucked rooted ferns (not the common variety). The writer was conversing with the capable and most painstaking caretaker, who had been at the pains to collect and plant these specimens in the park. He also under instructions, has posted notices that persons offending are liable to be prosecuted for removing any shrubs the property of the company.

Doubtless some persons may be found willing to justify such felonious removal of private property, but I think that the official should be armed with powers of a constable and exercise them on each such occasion that arises. The appearance of the offender would not permit of her being classed as a "know nothing." Why then could not remuneration (say, "fine") be exacted from her for the damage done, time and labor expended, etc., by the company, who are making grand efforts to aid in attracting visitors, to be met in this disgraceful, wanton, daylight purloining of property meant for general pleasure? Such conduct would disgust private owners of gardens and end otherwise.

ANTI-VANDAL.

PATRONIZING HOME INDUSTRY.

Sir—The Colonist has "boosted" and stands for a policy of patronizing home industries, and so help to build up a payroll city. May I ask you then to permit me a few lines to point out where one of the largest public institutions, supported by the provincial government and the corporation of Victoria, fails sadly to cooperate in this laudable idea to help the city

in which it is located. I refer to the Provincial Royal Jubilee hospital. A perusal of the steward's report embodied in the recently issued annual report will open the eyes of many subscribers to how made-in-Victoria products are simply passed up for foreign articles. Surely there is something amiss when one reads, "Hams, best American, 450 lbs."; "Hams, best American, 1,020 lbs." Mark the words "best American," and there is a packing house located right in Victoria whose product is said to be fully equal to the "imported"—even if it is labelled "best American."

Such items as Len & Perlin's sauce, Crosse & Blackwell's pickles, Keller's marmalade, Pure Gold extracts are included in the list of supplies purchased for the hospital, and it seems to the writer that quality and prices considered, the management of the Royal Jubilee hospital might well see that the steward investigates the merits of local manufactured goods before patronizing elsewhere, and so retain the money in our midst and help out the good work of upbuilding the city. A SUBSCRIBER.

A BOUQUET FOR MR. WHITNEY.

Toronto News.  
The session of the legislature which has just closed will stand in the annals of Ontario as one of the most fruitful ever held. Not only was the number of bills large, necessitating a great deal of committee work, but the measures, fostered by the government, were of such a bold, straightforward and plain-dealing kind that they arrested public attention and awakened enthusiasm, not only among Conservatives but among Liberals as well.

Spring Suits and Outing Suits in the fashionable light homespun and tweed effects, "Fit Reform" make, \$12, \$15 and \$18 per suit. Fit Reform Wardrobe, 73 Government street.

THE NEW EMPRESS.

Montreal Herald.  
It is an inevitable achievement of progress that however great an achievement may be, there is no standing still—no resting upon a pillar of contentment, and contemplating the glory of accomplishment. The Canadian Pacific has done a noteworthy thing in placing on the St. Lawrence route a vessel of the splendid qualities of the Empress of Britain, which in some respects transcends even the greatest liners now afloat—the Campania and Lucania, for example, in point of weight; and yet the minds of those who control the destinies of the company are already turning to something bigger and better if possible.

It is said that Alexander, when surfeited with his victories, sighed in vain for more worlds to conquer. No such fate awaits Sir Thomas Shaughnessy in the world of transportation. The possibilities of development are boundless on this continent. The announcement that the Empress of Britain and her sister ship, the Empress of Ireland, may be followed by four steamships of still more splendid proportions may indicate the possibilities that the St. Lawrence route has to prepare for. But the problem of size and speed in ocean steamships in relation to economic operation has still to be tested. Against the new leviathans will be matched myriads of smaller vessels operated at

less cost, because their needs are less. The economic race has still to be run. Whether the moderate sized vessel or the large one is to be the winner will depend upon experiments that will be made in the near future—experiments in which the Empress liners will play a part.

VACUUM PRESERVING JAR.

Cover Held on by Atmospheric Pressure—Readily Released.

A vacuum preserving jar is a recent invention of an Illinois man. The invention relates primarily to jars or other vessels for hermetically sealing and preserving fruits, foodstuffs, beverages, and so on. The cover is held on by atmospheric pressure and readily released without injuring the cap, so that the vessel can be refilled and used an indefinite number of times, thus adapting it for household as well as other purposes. In the illustration it is shown in connection with a jar, the upper end of which is formed with a flange, upon which rests a cap so shaped as to

form a tight connection. Around the edge of the cap is a rubber gasket. The centre of the cap is formed with a small vent, closed by means of a rubber valve. A vacuum or partial vacuum can be created by bringing the contents to a boiling temperature, which will cause the outside atmospheric pressure to tightly close the rubber valve in the cap; or the aid at the top of the vessel can be exhausted by means of a simple pump. In the latter event the invention can be used for preserving materials without cooking. The invention is adapted to the use of any other material than glass for jars, and the form is not necessarily limited to that indicated in the drawing. Both the jar and the cover are made entirely of glass, making it nonpoisonous, with the advantage that it can be used again and again.

ECZEMA FOR 20 YEARS.

"I was troubled with eczema for twenty years and was treated by three doctors to no avail. Dr. Chase's Ointment has cured me completely and I have not had the slightest return of this disease."—John Pratt, Blyth, Huron Co., Ont.

"I Found No Poisons In Steedman's Soothing Powders"

Evidence of Dr. Chas. J. Fagan, Secretary Provincial Board of Health.

The jury returned the following verdict at the adjourned inquest on the infant May Duval, who died in Victoria, B. C., on January 7, a Steedman's Soothing Powder being the last medicine given:

"THAT THE CHILD, MAY DUVAL, DIED FROM NATURAL CAUSES, AND FROM THE EVIDENCE GIVEN THERE IS NOTHING TO INDICATE THAT THE CHILD'S DEATH WAS CAUSED BY THE USE OF STEEDMAN'S SOOTHING POWDER."

In consequence of the wide publicity given to this case and the fact that the unduly prolonging of the inquest, has given opponents an opportunity to impugn the composition of the GENUINE STEEDMAN'S (two E.E.S.) SOOTHING POWDERS (Walford, Surrey, England), the proprietors are desirous of placing the facts before the public.

The Public Analyst stated upon oath that he found NO POISON IN STEEDMAN'S SOOTHING POWDERS and the verdict of the coroner's jury given above clearly exonerates Steedman's Soothing Powders.

Sworn testimony was submitted by the manufacturer's counsel, Mr. Rogers, as to the great care exercised to ensure perfect division in the preparation of the powders which have been manufactured for eighty years.

Country House Designs in Dinner Sets  
According to the dictates of Fashion the table crockery in the summer home should be just as "old fashioned" in appearance as possible.  
The Spring days will set you thinking of cottage furnishings and we desire to impress upon your mind, even this early, the fact that your needs have been anticipated.  
Besides the table crockery of unique designs there are lots of other things here you will require. Kitchen things and Toilet Sets, for instance.

Amherst Shoes please particular people.

The Metric System.—Next Monday evening Dr. J. H. McLennan will lecture under the auspices of the Victoria board of trade at the board rooms on the metric system. Dr. McLennan is a fluent and pleasing speaker and is thoroughly familiar with his subject. The adoption of the metric system in Britain and the empire has had many distinguished advocates and equally distinguished opponents. The lecture is certain to be very interesting.

New Pleasure Launches.—The local gasoline launch fleet will in a few days be increased by the addition of three new ones which are being completed in local yards for, respectively, Mr. Cooper, of the firm of Brown &amp; Cooper, George Weiler and Walter Chambers. Victoria is now able to muster as good a showing in such pleasure craft as any city of its size on the coast, if not on the continent.

Seeks Her Brother.—Mrs. Willamina Woods, of 104 Mount street, Belfast, Ireland, has written Mayor Morley making inquiry as to the whereabouts of her brother, Robert Joseph Madden, of Belfast, Ireland, who went to South Africa about 20 years ago. In 1898 he advised his attorney in Swaziland that he was going to British Columbia, and since then nothing further has been heard of him. Any information about him would be gratefully received by his sister.

By His Own Hand.—As a result of a gunshot wound inflicted by his own hand on Friday last, Jonas Throup, a pioneer resident of Saanich district, passed away on Sunday at his residence. An inquest will be held today. Deceased was a native of England and has resided here for many years, being a stonemason by trade. He was 69 years of age and had been in ill health for a considerable time. He had in consequence become discouraged and regarded his life as a burden. He leaves a widow, two sons and four daughters.

New Furniture Van.—Today there will be placed in service by Messrs. Weiler Bros., a new rubber-tired furniture van, the first of its kind to be built in this city. It is constructed entirely of Australian hardwood, the body being 10 feet long by 4 feet 6 inches wide; the seat being supported by three steel goosenecks. The body of the wagon is only two feet clear of the ground making it easy to load and unload with no harm to the contents. A lining of Brussels carpet protects the furniture still further by preventing chafing. The platform gear is also a local production and permits the forward truck to move in a complete circle, allowing the wagon to turn around in a space equal to its own length. This vehicle, built by T. M. Brayshaw at a cost of nearly \$700, will be in the parade in Thursday next and Weiler Bros. confidently expect to capture the prize offered for this style of wagon. Two rubber-tired light delivery wagons owned by W. Speed and one of the same kind owned by W. Fell &amp; Co. together with baker's carts belonging to D. W. Hanbury will also be in the parade showing the superior work of the Victoria wagon builder.

Fraternal Visit.—Last evening the Royal Templars paid a fraternal visit to Triumph lodge, Good Templars, at the Sailors' and Soldiers' Home, and a most enjoyable time was spent.

Maccabees' Review.—Victoria Hive, No. 1, Ladies of the Maccabees, will hold its regular review this evening, at 8 o'clock sharp, in the A.O.U.W. hall. All officers and members are requested to attend.

District Meetings.—A meeting of those interested in fruit growing will be held at Garden Head tomorrow evening, and one at Saanich on Friday evening. A good turn out at these meetings is hoped for.

Closing Lecture.—Tonight Prof. Alexander will give his closing lecture at A.O.U.W. hall. The subject will be "The Practical Use of Science in Everyday Life." There will be no admission fee. Prof. Alexander leaves for Chicago on Wednesday evening.

Territory Extended.—J. W. Ambury, of Victoria, representing Hiram Walker &amp; Co., is now touring East Kootenay in the interest of his firm. He has had the two northwest provinces added to his territory, and is a very busy man in consequence.

Meet at Dunsmuir.—J. C. Metcalfe, of Hammond, Henry Kipp, of Chilliwack, and W. J. Brandreth, of Ladner, all of whom are members of the B. C. Fruit Growers' association, arrived on the Princess Victoria last evening on their way to Dunsmuir to attend the regular quarterly meeting of the association, which will be held there today.

Patriotic Concert.—The concert of patriotic music by the pupils of the Girls' Central school, with the assistance of Mrs. D. E. Campbell and Messrs. Lawfield and J. G. Brown and given this afternoon at 2.15 o'clock, in the Pemberton gymnasium, at the Central school, The Lord Bishop of British Columbia has kindly consented to deliver an address on "The Empire." Parents, clergy, and the public generally are cordially invited to be present.

Gun Club Shoot.—At the Victoria Gun club shoot at Langford Plains on Monday afternoon, the competitions were the first of a series for medals presented by the Dominion Cartridge company. They were won by T. Peden with a score of 21; O. Weiler, with 20, second, and E. J. Wall, having 19 to his credit, third; while the second was captured by O. Weiler with 21 and Messrs. Patton, Wall and Peden following in the order named. The possible was 25, and the conditions known traps, unknown angles.

Excursions to Vancouver.—In connection with the Victoria Day holidays a special rate of single fare for the round trip will be in effect from this city to Vancouver by the Princess Victoria, the tickets being on sale next Wednesday and Thursday, good to return as late as next Sunday. This affords an excellent opportunity to spend the holidays with friends in the Terminal City. The Princess Victoria sails from here each morning at 7.30 a.m., and returning sails from Vancouver at 1.00 p.m.

Double Train Service.—In order to afford an opportunity for sportsmen and others to spend a quiet day in the country during the Victoria Day holidays the E. &amp; N. Railway Co. have arranged a double train service for next Thursday, Victoria Day, the regular morning train leaving here at 9.00 a.m., and a special train, returning, will arrive at 7.55 p.m., the same as on Saturdays, Sundays, and Wednesdays. Specially reduced rates are also in effect to Shalman Lake and Goldstream, good for Victoria Day only, while regular excursion rates will be in force to all other stations.

Migratory Birds.—E. M. Anderson, assistant curator of the provincial museum, is back from the Clayoquot district, where he spent a month collecting specimens of migratory birds for that institution. His quest was extremely successful, over a hundred beautifully plumaged specimens being secured. Among them were fish hawks, harlequin ducks and red phalaropes. The latter were in striking plumage, with the red collar feathers, showing the moderate climate of the section visited. Probably the most interesting among the many specimens was a pair of humming birds in full plumage.

"Canada Is Booming."—H. Bell-Irving, of the firm of H. Bell-Irving &amp; Co., of Vancouver, who has just returned from a trip to England, says in an interview: "Canada is booming in England and I have never seen this country looked on with such favor over there. You hear it everywhere you go, and no part of the Empire is as much in the public mind at present. Of course, particular attention is paid to the prairie country, and the government lands which are to be obtained. Canadian investments are also looked upon favorably. Business, too, in the O. C. Country is wonderfully prosperous, and England is right in the front of the wave of prosperity which seems to be sweeping over the world."

G. T. P. Terminus.—Preliminary work looking to the establishment of the Grand Trunk Pacific terminus on Kaien island has now begun in earnest says the Vancouver News-Advertiser. Engineers Pillsbury and Hill have taken up their quarters with a corps of assistants in the old Mission village of Metlakatla, on the northern shore of Tuck's Inlet. From there the steamer Kuster is engaged in making out the necessary supplies to the townsite of Prince Rupert. Mr. W. D. Hays and his foreman, Mr. Mitchell, have also gone up on the steamer Camosun, and will select a site for a sawmill and lumber yards in the neighborhood. Engineer Pillsbury of the Grand Trunk engineering staff, has engaged a number of Indians to clear camping grounds, and has selected a site on Kaien island for the location of a wharf and buildings.

S. O. E. Church Parade.—On Sunday afternoon there was a very large turnout on the occasion of the annual church parade of the Sons of England. The members met at the K. of P. hall at 2.30 and marched to Christ Church cathedral. At church they were met by the Daughters of England and members of the L. O. L., service being held at 3 p.m. The choir was present at the church and rendered appropriate music. The sermon was preached by the bishop, the Rev. W. W. Perrin, who is a member of the order of the S. O. E. B. S. He also announced that the collection taken up at the close of the service would be donated to the hospital Sunday fund. On leaving the church the parade reformed and marched to the A. O. U. W. hall, where, after a few short speeches, they dispersed.

**CANADIAN SECTION OF IMPERIAL INSTITUTE**

A Display That Is Worthy of Every Section of the Dominion.

IT IS A GREAT TRANSFORMATION

Appearance of the Re-Arranged Exhibits Described by a Correspondent.

London, April 28.—The Canadian section of the Imperial Institute will be re-opened to the public in a few days. Those who have seen this exhibition as it was when the provincial governments were responsible for it will be greatly surprised at the transformation. At last we have here in the metropolis of the empire an exhibition which is in every way worthy of the great Dominion, and I am sure that Canadians who visit it this summer will acknowledge that the money which the Dominion government has spent in clearing out the wretched show of exhibits which tended to advertise Canada's poverty has been well spent in making it what it is now—a startling and magnificent display which from end to end advertises Canada's boundless opulence and greatness. It puts all the other colonies to shame. On entering the colonial galleries from the main building one observes that Australia, New Zealand, the Cape, Natal, India, Ceylon, etc., are each striving themselves to imitate Canada's example; but they are all a long way behind. Owing to the enterprise of the Canadian commissioners who were charged with the duty of reorganizing their section, the best location has been conceded to Canada. Passing through the other colonial sections, which are miserably partitioned off in small compartments, we emerge at a noble flight of steps. Between the steps the name Canada is to be emblazoned. On the front the visitor is attracted by a splendid show of specimens of Canada's famous moose and caribou and other big game. Descending the steps we enter the main gallery allotted to the Dominion. It is spacious and lofty and beautifully lighted. Altogether the superficial area is some 14,000 feet, and every inch of it is most judiciously and artistically employed to show all the world the wealth of Canada's natural resources. One half of this long gallery on the ground floor to the right of the steps is devoted to agriculture and that to the left is filled with mineral exhibits. Facing the steps is a handsome case set in the wall showing the immense variety of Canada's fishery resources. This will be a delight to the angler, as the big game will be an amazing attraction to the sportsman.

**Unique Feature**

Looking along the vast gallery, which is not broken by any partition as in the other Colonial sections—one sees on one side a series of show cases which it is safe to say are unique in exhibitions.

**A Grand Medicine for the Kidneys.**

Don't suffer—don't experiment—don't waste money on unknown, untried remedies. There is one quick cure—one certain cure—one cure that everybody knows does cure Kidney Trouble. That's Gin Pills.

"I have been a sufferer with Kidney Trouble for years. Have tried medicines and doctors' prescriptions, but could get no permanent relief, my case being pronounced chronic. As it is generally known that the properties of gin without the alcohol is good for the kidneys, I decided to try Gin Pills, but must admit with very little faith. From the very first pill I got relief, and have since taken nearly four boxes and am COMPLETELY CURED, but am going to continue them a while longer. No dull, sickening pains in the back—no low spirits—am increasing in weight and more vim and vigor than I have had for years—is what Gin Pills have done for me."

"H. P. HERBERT, Ottawa."

Be well and strong. Be free of pain. Be able to enjoy all the good things of life, with all your old-time vigor and enthusiasm. Gin Pills will cure those sick kidneys. Start now—to-day—and see how much better you feel to-morrow. 50c box—6 boxes for \$2.50—and your money back if they don't cure.

Special offer: If you send us your name and address and tell us the name of the paper in which you read this we will send you a trial box absolutely free and post prepaid. Write today and get the medicine that cures.

The Boile Drug Co., Winnipeg, Man.

**THE ARK**

They are built along the walk from floor to ceiling in an unbroken line—each case having a frontage of about fifteen feet which is enclosed, not by ordinary folding doors but by a sheet of plate glass like a shop window. This ensures that the exhibits will be absolutely dust proof and inaccessible to meddling visitors. The massive frame of these cases is uniform throughout, built of polished mahogany. Over the glass front, all along the gallery are a series of very striking inscriptions in gold letters, which tell the visitor: "Canada is 3,500 miles long by 1,400 miles wide." "Canada has received 200,000 settlers from the United States." "Ninety-five per cent of Canada's people are British born subjects and so on. In the agricultural end of the gallery, each case encloses an immense oil painting; a series of these striking pictures show the progress of the settlers in the far West; one shows the first breaking up of the soil; another shows a horse ranch, another a vast herd of cattle and sheep on the prairies. One splendid scene is the rich golden harvest of a settler after ten years' progress, while another most interesting picture shows a visit of one of the mounted policeman taking his report from the settler that all is well and no complaints.

There are eleven of these great paintings in the agricultural end of the gallery and in themselves they are of great educational value for they show to the intending settlers at a glance what prospects Canada offers to the agriculturist. The interior of each case is most artistically set off with luxuriant specimens of grain and fruit and vegetables. Below each picture is a big tablet bearing in gold letters a few lines of explanation which, altogether, give the visitor a great amount of information which must force him to think. For example, below the picture of a settler's homestead we read: "Note how this thrifty Hungarian settler who in 24 years on 100 acres of the land in western Canada has erected houses and out-buildings—planted trees, supplied free by the government—Reaper and abundant harvest and has most of his land under cultivation. This settler came with very little capital and is now independent." Considering that our English country folk and visitors from all parts of Europe will visit this exhibition in thousands, it may be said that these pictures, with their striking statements, such as the above, quoted and prove of incalculable value in advertising Canada.

**Other Notable Displays**

Facing these imposing scenes on the other side of the gallery is a long row of handsome, large show cases on stands, containing specimens of grain, bottled fruit, vegetables, canned food, bottled fish, etc. On the massive mahogany panels, one must not forget to notice the pretty hand-painted drawings of Canadian wild flowers, which will be as charming as they are unfamiliar to English visitors. Leaving the agricultural section, one cannot help lingering at a picture showing the view of the coast from the sea, and reading along the fascinating inscription below it: "The continued prosperity and good laws of Canada contribute to the settlers' welfare and they are invariably anxious to become a citizen of the country and a loyal British subject."

This prospect—the inscription below it—neighboring scene—induce the visitor not to any nationality, because it may be seen generally among settlers from United States, Great Britain, France, Germany, Austria, Hungary, Russia, Holland, Norway, Sweden, Denmark, Belgium. These telling statements are bound to hit visitors and John Bull in particular fairly between the eyes and stagger them. For the exhibit of fish we are informed that they are present an annual revenue of 25,000,000 dollars a year. In the mineral section, the investor, the capitalist and the man of business are astounded at a display of Canada's wealth such as has never been presented here before. In a series of eight wall cases uniform with those in the agricultural section, we see at a glance the principal working mineral of Canada. The idea is to strike the imagination of the beholder with the fact of Canada's massive and illimitable natural wealth which is waiting for man's industry and enterprise to develop and make use of one magnificent case which is a thing of great beauty, shows a general display of a few of the most famous Canadian minerals of Quebec, and its value is suggested by the number of varied products from pipes to fire proof screens and wall paper—which are shown above the crude masses of rock in the bottom of the case. Another attractive exhibit is nickel, from the Sudbury mines.

**LIGHTS FOR WEST COAST**

(Continued from Page One)

when it is established it will be of the same order as that at Leonard Island. Small lights have been established, Whigam, 31 days lights, similar to those on Amphitrite point and at Sechart, which, I was told, were giving every satisfaction, on Entrance Island at the mouth of Quatsino Sound and on Lookout Island at the mouth of Kynnot Sound. There is, of course, very little traffic in those waters, and the lights are more for the aid of the coasting steamer than anything else.

"Will any other aids to navigation be established?" the interviewer said.

"The question of the establishment of wireless telegraph stations is now being considered by the department and it is probable that this work will be carried out. The suggestion is to put a station at Cape Beale in connection with the Pacific cable station and another station at River's Inlet."

"When in the north," continued Col. Anderson, "the steamer Quadra landed Mr. Dodge, surveyor and a survey party at Prince Rupert on Kaitum Island and a base station was established there for carrying out of the hydrographic surveys at Prince Rupert for which purpose the party was taken north. We also met Capt. Learmonth of the British survey steamer Egeria which is engaged in making surveys of Port Simpson and vicinity. Divon entrance and other channels which would be utilized by shipping, and a railway terminus is established in the north. Surveys for wharves are being made at Prince Rupert. We met Mr. Hayes, brother of the general manager of the Grand Trunk Pacific at Prince Rupert, where he was arranging for the establishment of a sawmill and had two survey parties out."

**NOTABLE MINING DEAL.**

Promising Howe Sound Properties Are Purchased by English Capitalists.

The big Mallery mineral claims, known as the Twentieth Century group, located on Howe Sound, between Mill

Creek and the Squamish, and just opposite the Britannia, have been purchased from the owners, Mallery, of Los Angeles, by Mr. Cowper Thwaite of London, England, who is understood to be associated in the deal with a number of capitalists there, says the Vancouver News-Advertiser. The purchase price is \$250,000, of which 10 per cent has been paid down.

According to a statement made by Mr. Cowper Thwaite, the work of developing the claims will be proceeded with without delay. It will be carried on under the direction of Mr. Thomas Gibson, a mining man who has spent twenty years on the African Rand and who will arrive here in a few weeks from Mexico, where he is at present engaged in inspecting a number of mines owned by Mr. Cowper Thwaite's syndicate.

For immediate use a steam power plant will be installed on the property, but it is hoped in the near future to develop the water power in the vicinity, which is estimated to be capable of producing 40,000 horse power altogether. Contracts for the construction of ore bunkers and deep-water piers are to be let without delay, and a five-hp compressor plant will also be installed at once, so that within six months the project, expected to be in a position to ship 300 tons of ore daily to the Crofton smelter.

The sale was made as a result of a recent personal inspection of the property by Mr. Cowper Thwaite. He said that he found that his engineer had been very conservative and he decided to purchase at once. He will incorporate at once as the British West Copper Company, with a nominal capital of \$500,000, in shares of the par value of \$5 each. Mr. Cowper Thwaite speaks highly of the richness of the property, which he has just seen. It is his intention to purchase all supplies in Vancouver, and he estimates that there will be an outlay of \$200,000 during the first year.

**Colds Caused by Cold, Wet Feet**

Few children understand the danger of getting their feet wet, and especially on their way to and from school delight in trying the thin ice. The usual outcome is colds, croup and severe coughs and much anxiety to parents.

By the prompt use of Dr. Chase's Syrup of Linseed and Turpentine you can keep the cough loose, prevent further development of the cold and cure it up in two or three days, whereas the usual lifetime of a cold is three or four weeks, to say nothing of the serious results so frequently the outcome.

Mothers insure their children against croup by the use of the great family medicine, for if given frequently in small doses it prevents the dreadful choking spasms, and soon effects a thorough cure.

Whooping cough, bronchitis, asthma, croup and severe chest colds are quickly brought under control by the use of Dr. Chase's Syrup of Linseed and Turpentine, 25 cents a bottle, at all dealers, or Edmundson, Bates & Co., Toronto.

**WOMEN'S PRESS CLUB.**

Western Canadian Immigration Association to Entertain the Members.

The Winnipeg Free Press, in its issue of May 12th had the following under the caption "The Press Women's Club": "The Canadian Women's Press club is enjoying popular favor of the railway gods, it would appear, and the Western Canadian Immigration association, an energetic secretary. Theodore M. Knapp, of Minneapolis, has become imbued with the idea that the organization is worth cultivating. The secretary of the C. W. P. club has recently received from the secretary of the aforesaid immigration association the courtesy of an invitation for club members to visit Banff, Edmonton, Prince Albert, Regina and other intervening points of interest. The secretary of the association: a splendid private car, Pullman, dining accommodation, etc., all quite free and offered as an acknowledgment of the work of the women writers in the past for Canada."

The invitation, it is needless to say, has been accepted, and a number of Canadian writers will be joined by some very prominent American women writers from the United States, Des Moines, Chicago, Detroit, New York, Minneapolis, Cincinnati, etc., will be represented, and the outing of the combined party will last for about two weeks.

This courteous action on the part of the Western Immigration association and the Canadian Pacific railway and other roads over whose lines the special car will be hauled, bespeaks volumes for the generosity of both. But it also says something for the press of Canada and the United States, whose big dailies have discovered a use for women's work; and it may be stated right here that Canada can send out a pretty representative number of women writers, second to none anywhere in the ink world, such as "Kit," "Francoise," E. Cora Hind, "Peggy," Katherine Hughes and Margaret Graham Horton. Agnes Lunt, who has reached a high rung in the ladder, as has Agnes Deans Cameron, Mary McLeod Moore, from New York, and Mrs. C. P. Marston, and others not so well known, whose writing tongues have yet to be heard by wider circles.

The club meeting has been definitely fixed for June 8 and 9, and the Banff trip begins on June 11. A programme is being arranged for the Winnipeg dates.

**ASTHMA**

Almost too good to be true to know that Asthma can be Cured.

But it is true, beyond the shadow of a doubt. Clarke's Kola Compound permanently cures Asthma. It has been tried and tested in thousands of cases, and never has it failed. It has saved the lives of hundreds who were so shattered in health by their sufferings, that Consumption seemed inevitable.

Mr. H. Salmon, Toronto, Ont., says: "For some years, I have been a great sufferer with Asthma. The attacks became so severe and coughing spells lasted so long that I was alarmed. I consulted many physicians, but their medicines only gave temporary relief. One of the leading physicians told me I was threatened with Consumption. I had a bottle of Clarke's Kola Compound and I was cured. This was over a year ago, and I have gained twenty pounds in weight."

We send free, a bottle of Clarke's Kola Compound to every sufferer. Write to-day.

The Griffiths & Macpherson Co., Limited, Toronto, Canada.

**THE ARK**

**A BIG PULP MILL IS TO BE BUILT**

Expenditure of \$200,000 Contemplated by a Local Company.

The northern end of Vancouver Island, particularly in the vicinity of Quatsino Sound, promises to be the scene of some pretty extensive development work the coming season. Yesterday it was announced that the Quatsino Power & Pulp Co., Ltd., owning sixty to seventy thousand acres of timber land, will immediately let a contract for the construction of a pulp mill on Quatsino Sound.

Seen at his office, C. H. Lagrin, secretary of the company, confirmed the report, and said: "The company will erect a pulp mill having an initial capacity of 200 tons per day. The erection of such a plant will involve an expenditure in the neighborhood of \$200,000, the funds for which have been provided by eastern capitalists. It has taken some little time to perfect all arrangements, but I am safe in saying that the plant will be in operation by the end of the year."

Asked if the company intended going directly into the manufacture of paper Mr. Lagrin replied:

"Ultimately that will doubtless come. For the present, though, we expect to find a market in Asia for the entire output of the mill. The company also intends engaging extensively in the logging business, and will build a large export mill."

Mr. Lagrin, who has been working for some considerable time in directing the attention of investors to the possibilities of the northern end of the island, is most sanguine that the time is at hand when money will be freely forthcoming to exploit and develop the natural resources of both mine and forest. He instanced the case of James A. Moore, the Seattle capitalist, who has acquired large holdings of "hot" mines, and said that Mr. Moore was now in the east to seek his export, Walter Kennedy, of Pittsburgh, and the latter is shortly to leave for Ottawa to meet Hon. Mr. Templeman and Dr. Haanel, the Federal expert of the treatment of ores, to discuss with these gentlemen the possibilities of the production of iron by the electro-thermal process and the utilization of the water power of Vancouver island in the manufacture of pig iron and probably steel. The outcome of the conference between these gentlemen is awaited with great interest by local citizens interested in iron deposits, as the satisfactory solution means the establishment somewhere on the island of an immense industry.

**PROGRESS IN BOUNDARY.**

Visitors From Greenwood Say Great Development Is in Progress.

A. M. Whiteside, barrister, and Edward G. Warren, manager of the Greenwood Electric Company, Limited, of Greenwood, arrived in the city yesterday and are guests at the Driad Hotel. Their business here is to arrange for the acquisition and transfer of the charter held by the Greenwood City Water Works Company, Limited, owning the water power at Boundary Falls, to the Greenwood Electric Company, Limited. This done, the electric company will proceed with the intricate task of a water power plant at the falls for the purposes of supplying power for electric lighting and commercial purposes to the city of Greenwood and the town of Midway. Boundary Falls, on the creek of the same name, is situated about midway between these two prosperous and growing towns.

"These falls, when harnessed, will develop 150 horse power at low water, which extends for a period of about two months," said Mr. Whiteside last night in discussing the proposed improvements. "A minimum of 200 horse power is obtainable for the balance of the year. The development of the power, with a view to supplying the towns with electric light, will be undertaken at once. Owing to the fact that 150 horse power, the minimum output of the falls, will not supply the growing needs of both places, it is proposed to install a suitable plant using a reserve steam unit and a storage dam of 1,000,000 cubic feet to carry over the peak of the load. As the load factor of the system will not exceed 50 per cent of the total contracted load, it is not expected that steam will be needed except in cases of emergency."

Speaking of the Boundary district generally, the visitors said that times were good and conditions more prosperous than ever before. The enlargements going forward at the three big smelters and the consequent increased tonnage from the big low-grade copper-gold mines necessitated employing larger forces than ever in the past, and the development of the ore bodies, and as a consequence business everywhere was being stimulated to a wonderful degree. The high-grade silver-gold mines in the Greenwood camp were sending out a steady supply of rich ore and were attracting considerable interest among investors. Altogether the whole district, and particularly Mr. Whiteside's home town, was forging ahead in an unmistakable and highly satisfactory manner.

**THE WEATHER.**

Meteorological Office, Victoria, May 21—8 p. m.

A shallow trough of low pressure over the Rocky mountain regions from Cariboo southward to Utah and Nevada. Moderate rain has fallen from British Columbia south to upper California. Unsettled weather conditions prevail on the North Pacific slope, with temperatures below the normal for the season. In the Northwest moderate to heavy rain has fallen in the western provinces and the weather is unsettled and cool.

**TEMPERATURE.**

to forget the terrors though which they have so recently passed.  
It is fortunate that these ladies possess the happy temperament which enables them to accept their ill fortunes philosophically. They are witnesses, too, that the same heroic aptitude for accepting harsh fate with grace, is displayed by the majority of those in stricken San Francisco. The disposition to smile in the face of calamity is everywhere to be noticed. Many and intensely interesting are the incidents these two ladies relate in connection with the week of tremor and fire; one with a humorous touch is in connection with the heterogeneous muster in the streets immediately after the shock. Night raiment was most of all in evidence; blue, pink, and white the standard colors upon parade. In front of the Hotel St. Dunstan one tall and dignified gentleman, evidently a traveler from distant England, was standing, a short overcoat accentuating rather than concealing blue pyjamas, terminating in well-worn chamber slippers. At the other extremity was perched a jaunty opera hat, and the costume was made complete in its eccentricity by the bundle that was carefully held in one hand—the familiar gray of golf sticks, umbrellas and cane, encased in a typically British travelling rug.

The gentleman was waiting for some one, and when she appeared—evidently his wife—in a gown of dainty silkenness, her feet shod in storm rubbers, her hair loose and flowing, and with a blanket carefully pinned around her shoulders—the white she drew on a pair of long opera gloves, the Englishman's ideas as to the eternal fitness of things awakened.

"Surely you are not coming in that costume," he asked in amazement.  
"In all the horror of that hour," says Miss Dahl, "I couldn't suppress a smile. Oh! If his wife had only had a mirror to present to him!"

Miss Dahl is to open her new American tour with a concert at Institute hall here on Tuesday evening next, when she will be heard in some of her greatest successes. She is a young woman magnificently endowed by nature both as to voice and presence, and it is said that the splendid music of Grieg has no greater living exponent than this, the composer's countrywoman. Grieg himself has thus accredited her to the American people.

"It gives me great pleasure to introduce my compatriot, Miss Olivia Dahl, to the American public. She is a most capable singer and possesses a beautiful, sympathetic voice. She moves with surpassing ease in the domain of song literature, interpreting with equal intelligence the varied sentiments of the art song and of the popular ballad."

"I feel confident that Miss Dahl, with her attractive personality, will win the sympathy and appreciation of music-loving circles in the far West."  
"EDVARD GRIEG."

New Styles in Shirt Waist Suits.—This model is characteristic of the latest design for the every-popular shirt waist suit. It is built up of polka dot silk, effectively trimmed with self-stitchings and straps of plain taffetas. The skirt is cut in circular shape and its trimmings end just where the gores widen into the flared effect. The most striking feature of the costume is the bodice, which fastens over the waistline showing beneath a birdie of dark silk bound with taffetas such as is used upon the skirt. The neck is cut low to show a vest of dainty linen and finishes with a quaint collar of silk. On either side of the front are broad plaits, widening into epaulettes frills at the shoulders.

The puffed sleeves are finished with bands of taffetas and lace.

The shirt waist suit is quite as popular as ever, but it has undergone so many changes that its old admirers scarcely recognize it in its various new guises. One feature, however, remains, and that is the sweet simplicity of the mode, which has been supplemented by many little accessories that make it better suited for around wear. This costume duplicated in heavy linen is extremely effective, the newest mercerized effects being especially popular just now. Tulle frocks covered with French knots in dainty colors are very pretty, and likewise expensive but their beauty fully makes up for everything else.

## CROWDS COMING FOR THE BIG CELEBRATION

Reports From All Points Are of  
the Most Encouraging  
Character.

Reports from all points adjacent to Victoria are to the effect that big crowds may be expected for the Victoria Day celebration. A private letter received from an ex-Victorian now residing in Seattle says that far greater interest is being taken in the celebration this year than ever before. Continuing, the writer says: "It appears to me as if the automobile races are going to be the drawing card. Everywhere one goes he hears people referring to the races, and it looks as though there will be a big crowd to see the motor races." Many communications have been received from friends outside the city, and from the present outlook the attendance will be far greater than for many years past. A Victorian who has just returned from New Westminster brings the same gratifying report.

Westminster will come to Victoria in full force, was the remark the gentleman made when referring to the question of attendance. From Anacortes and Bellingham a monster excursion has been arranged. The Anacortes marine land has been engaged, and the steamer Whatcombe will leave Bellingham with as many on board as she will be allowed to carry. The C.P.R. has arranged a special rate of single fare for the round trip, which will be in effect from this city to Vancouver by the Princess Victoria, the tickets being on sale next Wednesday and Thursday. This return as late as next Sunday. This affords an excellent opportunity to spend the holidays with friends in the Terminal City. The Princess Victoria sails from here each morning at 7.30 a.m., and returning sails from Vancouver at 1 p.m.

Excursion Trains  
The E. & N. Railway company will also run an extra train, leaving Ladysmith so that the pleasure seekers may be able to reach this city in time for the parade. The V. and S. has also arranged a special service, and many will arrive from the outlying districts by this route.

The drawing card of the celebration, from the remarks heard on the street, appears to be the automobile races that will be held at the Driving park on the afternoon of Friday, 25th. The arrangements for the meet are in the hands of E. Ferris, and every mail brings him enquiries as to the conditions of the races. Those in charge of this event are expecting a monster attendance. The races have all been arranged, and the committee, like the others, are hoping for fine weather to ensure success. The visiting races are expected to arrive in this city on the morning of the 24th, and will take part in the parade, after which they will prepare for the struggle the following day. No answer has yet been received in reply to the challenge issued by S. Goodacre of this city, but it is expected that the owner of the Thomas car will be on hand when the races are called, and a race between these two will be arranged.

The drawing card of the celebration, from the remarks heard on the street, appears to be the automobile races that will be held at the Driving park on the afternoon of Friday, 25th. The arrangements for the meet are in the hands of E. Ferris, and every mail brings him enquiries as to the conditions of the races. Those in charge of this event are expecting a monster attendance. The races have all been arranged, and the committee, like the others, are hoping for fine weather to ensure success. The visiting races are expected to arrive in this city on the morning of the 24th, and will take part in the parade, after which they will prepare for the struggle the following day. No answer has yet been received in reply to the challenge issued by S. Goodacre of this city, but it is expected that the owner of the Thomas car will be on hand when the races are called, and a race between these two will be arranged.

## Piles

Quickly Cured in the Privacy of Your Own Home Without Risk or Danger

Anyone Can Easily Test it and Prove it, for a Free Sample is Sent by Mail to All.

Seven out of ten readers of this paper are tortured with piles or some form of rectal disease. You are, or you would not be reading this article. Thirty years ago doctors carried a lancet in their vest pocket and bled them hard, sometimes a quart at a time. It was the fashion then. All that is changed nowadays and a doctor with a lancet would be considered a curiosity.

Five years ago doctors "cut out" Piles wherever they got the chance. My husband and I went to one of the druggists, Mr. Heinbach, and procured a 50-cent box. I am now cured and will always recommend you highly to every one. You actually saved my life. My mind, too, was almost gone from the pain. Yours gratefully, Mrs. Rose H. Stouffer, 1603 16th St., Moline, Ill.

If you want positive proof of this send to the Pyramid Drug Company, 5887 Pyramid Building, Marshall, Mich. You will receive a free trial package by return mail. Try it, then go straight to your druggist, get a 50c. box and get well.

This is the greatest season on record for Washing Vests. Fit Reform carries the largest assortment, 73 Government street.

"MADE IN VICTORIA" GOODS.  
Several Good Positions Yet Available For Window Displays.

Inquiry at the office of the Victoria Development and Tourist association yesterday elicited the information that there are yet to be had several good business windows for the use of local manufacturers desirous of making an exhibit of "Made in Victoria" products. Retailers have acted generously in offering window space and "it's up to the manufacturers to take advantage so that celebration week may see every industry creditably represented by an exhibit of "Made in Victoria" goods. "The idea is one of the best advanced to educate not only visitors but Victorians also, with what is being made in the capital," said H. B. Thomson, general manager for Turner, Beeton & Co., Ltd. This firm was one of the first to realize the advantages of an exhibit display and the advertising that their "Big Horn" brand of union made clothing will achieve in the windows of B. Williams & Co. store. They purpose having a splendidly arranged and assorted exhibit of the different lines of clothing manufactured in their factory.

Another firm that has entered heartily into the spirit of promoting Victoria's manufactures is M. R. Smith & Co. Window space has been secured by them at Watson & Jones, Hastie's Fair and the Rochdale Co-operative Association's stores and a trio of artistically arranged displays of confections and biscuits is promised.

Pender's soaps and paints are also to be a prominent feature of the "Made in Victoria" windows, and many other firms are preparing exhibits. It is highly desirable that those who intend exhibiting make application for window space at once, so that the committee in charge can perfect arrangements. Attractively printed display cards with the legend "Made in Victoria" are now ready for distribution at the association's office.

**Furnace**  
Common Furnace Fire Pot  
Sunshine Furnace Fire Pot

The slanting fire-pots in common furnaces provide a rest-place for ashes and clinkers, and these clog the draft, prevent radiation, make the furnace hard to shake, and fill up the fire-pot.

The "Sunshine" pot is straight up and down, which gives an uninterrupted course to the draft, and prevents ashes and clinkers sticking to the sides.

The same skill and thought has been used on every feature of the "Sunshine" furnace—it is Canada's greatest heater.

Sold by all enterprising dealers. Booklet free.

## How Good Food may turn to Poison

DECAY is not digestion, you know, even when it takes place in the stomach.

Food decayed in the body after being eaten is as dangerous to health as food decayed before being eaten.

Food nourishes or poisons, just according to how long it remains in the bowels undigested.

Cascarets are the simplest and surest safeguard against Delayed Digestion yet discovered.

Sold in a thin Enamel Box, half as thick as your watch, which fits into the vest pocket or lady's purse as if it grew there.

In this round-edged Enamel box are found six small Candy Tablets.

One of these toothsome tablets works wonders for digestion.

Soon as placed in the mouth it starts the Saliva flowing, which at once gets to work dissolving it.

The Saliva becomes blended with the Candy Cascaret tablet, and from the moment they start going down your throat together they start working together.

Now, what do they work at? Bowel-work, of course,—Digestion.

Some folks think Digestion takes place in the Stomach only.

But that's a great mistake! Most of the Digestion occurs in the thirty feet of Intestines that connect with the Stomach.

Now, these Intestines are 30 feet long, for a purpose.

They are lined with a set of little mouths, that squeeze Digestive Juices into the Food eaten.

The Digestive Juices thus mix with

the food, just as Saliva mixes with Cascaret tablets, dissolving and changing that food into nourishment, as it passes along the channel.

The Intestines are also lined with millions of little suction pumps, that draw the Nutriment from Food, as it passes them in going through.

This Nutriment is then carried into the Blood, and spread over the Body as Brain, Bone and Brawn.

But, when the Bowel-Muscles are weak, the Food moves too slowly to stimulate the little Gastric Mouths and there is no flow, or too little flow of Digestive Juice, to change the food into nourishment.

Then, the food decays in the Bowels, and in the thirty feet of Intestines.

When this Decay begins the little suction pumps draw Poison from the decayed Food, into the blood, instead of the Nutriment it should have drawn.

Now, Cascarets contain the only combination of drugs that Stimulates these Muscles of the Bowels and Intestines just as a Cold Bath, or open-air Exercise, stimulates a Lazy Man.

Cascarets therefore act like Exercise. They produce the same sort of Natural result that a Six Mile walk in the country would produce, without any injurious Chemical effect.

The Vest Pocket Cascaret Box is sold by all Druggists, at Ten Cents. Be sure you get the genuine, made only by the Sterling Remedy Company, and never sold in bulk. Every tablet stamped "CCC."

A sample and the famous booklet "Course of Constipation," Free for the asking. Address Sterling Remedy Company, Chicago or New York.

# ALL THE WAY FROM RUSSIA

The following is one of the hundreds of enquiries received in connection with the special "Booster Club" offer of The Colonist in the interest of a revived campaign of publicity.

Warsaw, Russia, 29/IV, 1906  
 Dear Sirs  
 I have a honour to pray you  
 to be so kind as to send me a copy  
 of Special Edition of The Victoria  
 Daily Colonist, entitled: "See  
 The Island First", containing  
 the fullest information for  
 intending settlers and describing  
 all about Farming, Mining,  
 Lumbering etc. in the Van-  
 couver Island.  
 Yours very truly,  
 A. Nechaev  
 Warsaw, Russia.  
 Zlota Street, No 58, 3.

## ONLY TWO MORE WEEKS

The Special Immigration Promotion Offer of THE SEMI-WEEKLY or SUNDAY COLONIST for 55 cents for one year to any foreign address terminates with the present month.

Already hundreds of names have been added to the thousands living outside the Province who regularly read of Victoria through the medium of The Colonist, and before the end of the month hundreds more will be added.

Constant dropping wears away the stone, and 104 consecutive issues of a ten and twelve-page paper reaching any likely investor or settler in one year must have a decided influence in attracting capital to Victoria and Vancouver Island.

### THE OUTLAY IS SMALL

### THE POSSIBLE RESULTS INCALCULABLE

Let the newspaper tell your distant friends the story of Victoria's attractions and the Island's capabilities during the next twelve months. The seeker after news of distant fields looks first to the local newspapers, and the more the stranger learns of the City and Island, the more certain is the one or the other of another settler.

ADDRESS ALL ORDERS:

## DAILY REVIEW OF THE LOCAL MARKETS

Business was brisk yesterday among the wholesalers and commission men on Yates and Wharf streets, and the steamship venture will carry north a full cargo. The establishment of a regular seven day boat service between this port and San Francisco, over the former five day service, assures to the wholesaler a dependable service, and receipts of fruits and vegetables are plentiful just now. The receipts from the Golden Gate include cherries, peaches, lemons, tomatoes, new potatoes, lemons, and some exceptionally fine sweets and Valencia oranges. Navelis are on the wane, and will shortly be a thing of the past.

Among the new arrivals just in are Australian grapes, packed in granulated cork in 20-lb. boxes. To the trade the price is \$4 per box.

Strawberries with the trade are quoted at 50c per lb., and at the price asked by the retailer these berries are beyond the reach of the average buyer. The price of lettuce is about 10c, and the offerings of asparagus are nearly over. The offerings of gooseberries, tomatoes and cucumbers are plentiful.

Shining your own shoes with 2 in 1 is both a luxury and an economy. 2 in 1 Black Polish is known as "Black Lightning." Your shoes are given the richest, glossiest black shine with only an instant's rub. Don't take substitutes or imitations.

The time used is Pacific standard, for the 12th meridian west. It is counted from 0 to 24 hours, from midnight to midnight. The height is measured from the level of the lower low water at spring tides. This level corresponds with the datum to which the soundings on the Admiralty chart of Victoria harbor are referred, as closely as can now be ascertained.

Esquimalt (at Dry Dock)—From observations during six months, in 1900, compared with simultaneous observations at Victoria. For time of high water add 14 minutes to high water at Victoria. For time of low water, add 17 minutes to low water at Victoria.

## FINANCE AND COMMERCE.

New York, May 21.—The stagnation of the trading in stocks today was almost complete at close and dealings fell to the smallest aggregate for any day this year. Professional room traders became discouraged over the possibilities of profitable operations in view of the profound reaction of the market generally. The only stock in appreciable movements were in specialties, subject to individual causes. These were of the slightest effect on the general level, which declined aimlessly. Today was an ebullient in the high priced anthracite coals of a kind familiar to that quarter of the list. The money market continued easy, and was dull, the principal inquiry being for cable carrying over the entire year. Five per cent, was reported bid for this maturity money. Brokers reported most of the business at 1-1 per cent. Open, High, Low, Close.

Stock Brokers, Tel. 1705, Vancouver  
Buy and sell stocks and bonds for cash or on margin, on Toronto, Montreal, New York, and London Exchanges.

Coal (Dratt's) per can... \$1.50 to \$1.60

### DISEASES OF THE SKIN.

Eczema, Tetter, Salt Rheum, Ring Worm, Herpes, Barber's Itch, Itch or Scabies.

All of these diseases are attended by intense itching, which is almost instantly relieved by applying the Chamberlain's Salve and by its continued use a permanent cure may be effected. It has, in fact, cured many cases that have resisted all other treatment. Price, 25 cents per box. Every box is warranted. For sale by all Druggists.

### THE BRITISH AMERICA AND THE WESTERN OF TORONTO.

The above named companies have made public announcements as to their commitments in San Francisco. Their latest advice from the Pacific Coast indicate that the net losses of the British America will be \$275,000, and those of the Western about \$400,000. These losses will be paid without disturbing the companies' deposits in the United States. From 1874 to 1905, inclusive, the losses paid in the United States by the British America have been \$18,586,749, and those paid by the Western have amounted to \$28,340,137. Their San Francisco losses would have been considerably heavier had the conflagration occurred a year ago, for they have been reducing their business in San Francisco during the last year, and in the first three months of 1906 alone the amount written by the two companies was cut down some \$200,000, as compared with the same period last year. The British America had on January 1, 1906, assets in the United States aggregating \$1,542,949, and a surplus of \$496,403, and its home office statement showed a surplus to policyholders of \$1,949,834. The Western's assets in the United States amounted to \$2,397,608 and its surplus to \$782,945, its home office statement showing a surplus to policyholders of \$2,342,020.—New York Spectator.

### Will Dye any Article of Clothing From Feathers to Stockings

The Only Package Dyes That Make Fast and Unfading Colors.

Feathers, ribbons, silk ties, dress silks, skirt waists, dresses, costumes, capes, jackets and shawls can be dyed at home with Diamond Dyes so that they will look like new. Try a package of the Diamond Dyes, and see what a bright, beautiful, long-fading color it will make, with but little trouble.

Diamond Dyes are the greatest money savers of the age, as many a woman with one or two ten cent packages of these dyes has dyed her old dress a lovely and fashionable color so as to save the expense of a new one. Parly worn clothing can be made over for the little ones and by dyeing it with Diamond Dyes no one would recognize that the dresses and suits were not new.

Diamond Dyes are adapted to many uses besides simply dyeing old clothing. Diamond Dyes give new life and usefulness to curtains, furniture coverings, draperies, carpets, etc. Beware of imitation and common package dyes; ask for the "Diamond" and see that you get them.

Send to Wells & Richardson Co., Limited, Montreal, P. Q., for New Direction Book, Card of Dyed Samples, and Verse Story, entitled, "The Longjohns' Trip to the Klondike." All sent Free by mail.

### Local News

A Nuisance.—Complaints are made by people returning from church on Sunday evenings of the gang of loafers who congregate at the corner of Yates and Government streets, and also at the corner of Trowbridge avenue, on that evening, and render the sidewalks almost impassable. The attention of some of the husky members of the force to these loungers might mitigate the nuisance.

Has Been Underwritten.—It is announced that capital for the Canadian Pacific Sulphite & Pulp company to the extent of \$555,000, has been underwritten by the Canadian Finance Syndicate, of London. Work will be started at once on the townsite and mill at Swanson bay, on Princess Royal island, and in the vicinity of which the company holds leases on 80,000 acres of pulp lands.

To Entertain Pollards.—G. W. Kirs, proprietor of the riding gallery on Douglas street, opposite the city hall, has invited the Pollard Juvenile Opera company to ride on his riding platform this afternoon. On behalf of the juvenile opera singers Mr. Joseph Muller, the manager, has accepted the invitation, and made arrangements for the coming of the children at 1 p.m. today. The orphans were entertained on Saturday. Incident to the recently established amusement which has been so well patronized it is stated that a gentleman engaged in the amusement business has almost completed the purchase of a miniature railway to be established in Victoria or Vancouver.

Clear Fruit Lands.—Says the Lady-smith Ledger of Saturday: "A party of C.P.R. officials arrived in Ladysmith at noon today, and while a portion of them visited the upper section of the city, others were engaged in inspecting the tracks adjacent to the station, and the proposed new sidings. Land Commissioner Dennis, in conversation with a Ledger representative, stated that there were two gentlemen from Washington in the party who represented a company which made a business of clearing land. (The party had come up, said Mr. Dennis, to inspect some land at the back of Ladysmith with a view of having same cleared and put in shape for fruit raising. "I understand," said Mr. Dennis, "that there are about two thousand acres right back of the town, which, if cleared, will make good fruit lands. I have not yet visited the place, but after doing so, and if we find the place as we anticipated, about two thousand acres will be cleared. There is, I understand, more land lower down, but we would anticipate difficulty there owing to the smelter smoke, which would likely spoil any fruit raised in that vicinity."

**Taste WINDSOR TABLE SALT.** Does not "bite"—is not bitter. It is pure salt and all salt. Will not cake.

Use telephone to Seattle.

Northern Bank.—On Friday of next week the Northern Bank of Canada will open in the offices recently vacated by the C.P.R. on Government street. Godfrey Booth, the manager, is well known locally, having come here some years ago to join the staff of the Bank of British Columbia. He served in the London and San Francisco offices before coming to Victoria, and after leaving here was manager of the branch in New Westminster for two years before resigning to engage in the insurance business.

To See the King.—Says the Nanaimo Free Press: The trip of the Indian chiefs of British Columbia to London to see the King, as told in an interview with Chief Joe Capilano when he was in Nanaimo, will start on July 1, and for the first time since Vancouver has been, Chief Joe will not head the Indian mission band from across the inlet as it marches the streets on Dominion day. Chief Joe says it has not yet been settled how many of the chiefs would go on the pilgrimage to see the great white father, but they will all gather at his place on June 24. They will remain there discussing matters and arranging all details till July 1, on which day they will start for London. Nothing of a similar nature has taken place in the history of the province.

"Hospital Sunday."—Victorians responded in a very generous fashion to "Hospital Sunday," when in practically all the city churches special appeals were made for the proposed Queen Victoria maternity ward at the Jubilee hospital. At Christ church cathedral Bishop Perrin preached in the morning and Canon Beauland in the evening, the total collections realizing \$116.80. The other Anglican churches devoted the morning donations to the maternity ward fund and obtained large offerings. Rev. T. W. Gladstone preached in the morning at the Church of Our Lord on "The Church's Duty to the Sick," a special collection being devoted to the same object. The amount collected at the Metropolitan Methodist church was \$28.65. Other amounts at the various other churches are not yet obtainable, but it is certain that a very substantial sum has been realized.

### OBITUARY.

On Sunday afternoon the funeral of Richard Proctor took place, at 2 o'clock, from the residence, Bellot street, to Christ church cathedral. Rev. Canon Beauland officiated, and the following acted as pall-bearers: John Braden, J. T. Braden, J. T. Rodding, E. Pfender, D. G. Cox, and D. McNaughton.

A Phoenix correspondent, writing under date of May 16th, says: "Earl Erwin died yesterday morning at the Phoenix general hospital, and instructions have been received to ship the remains to his old home in Ontario, where his mother lives. Erwin came here just a year ago, and was employed in the Granby mines for a time. Latterly he has been troubled with abscesses of the lungs, and last week was taken to the hospital. It was decided that an operation was necessary in an effort to save his life, and it took place last Friday. He passed away, however, yesterday. Erwin was a young man of 27 years, and a member of the Eagles and the Woodmen. He came here from the coast, where he had been a school teacher, and had been employed at Van Andra."

### STRIKERS IN OHIO.

Pickets Persuade and Intimidate Imported Non-Union Men.

Stuebenville, O., May 21.—Out of forty non-union miners brought in to work in the mines of the United States Coal company today only eight reached the mines, the others being persuaded or frightened off by the strikers' pickets. It was stated tonight that an attempt to run the mines would be made tomorrow. A dozen strike breakers were taken from a train here today and went over to the union.

The mine union officials, in an attempt to maintain order in the camps, have forbidden liquor to be brought in to camp. The strikers are unable to get any mail that may arrive for them because the post office is on the coal company's ground.

### KILLED BY REVOLUTIONISTS.

Russian Peasant Couple Murdered and Son Wounded by Terrorists.

Liban, May 21.—In the district of Tadjikistan today a peasant couple were killed, their six-year-old son was wounded, and their house set on fire by a band of revolutionists. The crime was an act of vengeance because the peasants had led a Cossack patrol.

Visiting Autoists.—The Canadian Pacific railway is taking up the question of cheap week end trips for autoists and their machines from Seattle to Victoria. At present there is a little formality to be gone through in the filing of a bond for double the estimated duties, which bond becomes void once the machine is exported beyond the limits of Canada. If this safeguard were so changed as to cover a stated period, with privilege of bringing in and removal at any time during the continuance of the bond, the way would be clear for attracting visitors from the Sound to the perfect automobile roads of Vancouver Island. It is understood that the Victoria Auto club will take up the matter with those coming to the city for the races this week, and also give the visitors an opportunity of testing the splendid thoroughfares in the immediate vicinity.

Back From England.—John Hopp, who has been so prominently identified with the hydraulic mines of Cariboo, is in the city, having just returned from a trip to the Old Land. He has spent several months in London and other European cities. Mr. Hopp is delighted to hear of the success of John Holson in connection with the financing of his big scheme for the bringing of water to his mines. The introduction of the money of the New York capitalists into this Cariboo country is not intended to benefit this property alone. It will have the effect of advertising the British Columbia mines to the world, and will eventually aid the mining industry of the whole province. South Africa has ceased to be a desired field for the English capitalist. His attention is now diverted to British Columbia again, and Mr. Hopp thinks there is a very bright outlook for the industry.

### THE SOURCE OF NEURALGIA.

It runs hand in hand with poor blood and weak nerves. Health runs down, nerves get irritable, neuralgic torture follows. For the moment applications may relieve—but to thoroughly cure, the system must be strengthened with nutritious blood.

What can equal Ferrozone? It increases the appetite, forms abundance of rich life-giving blood, supplies nutriment and building material for worn-out nerves. Ferrozone completely cures neuralgia. Every root and branch of the disease is killed. Absolute success in every case. Stop suffering—fifty cents buys Ferrozone. Fifty chocolate coated tablets in a box at any drug store.
